1. Introduction

CoopCart is an online wholesale ordering platform for Abeyrathna Farms (Sri Lanka). It lets approved businesses browse fresh brown eggs by grade, see live wholesale pricing, place and track orders, and pay by bank transfer or cash on delivery. A separate admin console lets farm staff manage customers, products, inventory, orders, payments, deliveries, and reports. This manual explains how to use the main functions of the system for both customers and staff.

2. Purpose of the Manual

The purpose of this manual is to explain how to use the CoopCart platform correctly and efficiently. It serves as a step-by-step guide for wholesale customers placing orders and for administrators managing the business through the admin console.

3. Intended Users

This manual is written for two groups of users:

- **Wholesale customers** — shops, bakeries, restaurants, hotels, caterers, and wholesalers who register a business account to order eggs.
- **Farm staff / administrators** — team members who manage the catalogue, approve customers, process orders and payments, and view reports.

4. System Requirements

To use the system, users need:

- A device with internet access (mobile phone, tablet, or desktop).
- A modern web browser such as Chrome, Edge, or Safari.
- Access to their email account to receive the 6-digit verification code (OTP).

5. How to Use the System (Customer)

5.1 Accessing the Website

Open the CoopCart website in a web browser. The home page introduces the products, delivery options, and how the service works, with links to log in or register a business account.

Figure 1: The CoopCart home page.

5.2 Registering a Business Account

Only registered businesses can order. To create an account:

1. Open the Register page and enter your business and contact details, email, and a password.
2. Check your email inbox for the 6-digit verification code (OTP) and enter it to verify your email.
3. Submit your registration. Your account is then reviewed by the farm team.
4. Once an administrator **approves** your business, you can sign in, see wholesale prices, and place orders.

Note: wholesale prices and ordering stay hidden until your account is approved.

Register your business

Create an account. We'll review it and unlock wholesale pricing for you.

STEP 1 OF 2 - YOUR DETAILS

Full name *

5.4 Browsing the Catalogue

Open the Catalogue to view the available egg grades. Eggs are sold by the tray of 30 in three size grades — Medium (49–55 g), Large (56–62 g), and Extra Large (63–70 g). The minimum order is 5 trays.

Figure 4: The product catalogue. Prices appear once your account is approved.

5.5 Viewing Product Details & Pricing

Select a product to see its grade, weight range, description, and per-tray price. CoopCart uses bulk pricing tiers — larger quantities cost less per tray (typical tiers: 5–9, 10–24, 25–49, and 50+ trays). Prices are shown in Sri Lankan Rupees (LKR) once your account is approved.

5.6 Placing an Order (Cart & Checkout)

1. Add the grades and tray quantities you need to your cart.
2. Open the cart to review quantities and the order total.
3. Choose fulfilment: home delivery or free pickup from the farm.
4. For delivery, choose your zone and a delivery date. Deliveries run Mon/Wed/Fri/Sat; order before 6:00 PM the day before your chosen day.
5. Choose a payment method (bank transfer or cash on delivery) and place the order.

5.7 Making a Payment

- **Bank transfer:** transfer the amount and upload your payment slip in the app; farm staff verify it.
- **Cash on delivery (COD):** pay in cash when the order is delivered. (Card payments are not supported.)

5.8 Tracking Orders & Invoices

Open **My Orders** to track each order through its stages: Pending → Confirmed → Packed → Out for delivery / Ready for pickup → Delivered. You can also open an order to view or download its invoice.

5.9 Profile Management

From your profile you can view and update your business and contact details and manage your account.

5.10 Customer Support

5.10.1 FAQ / Quick Answers

The in-app assistant answers common questions about grades, pricing, minimum order, payment, delivery, and registration — helpful for solving simple queries instantly.

5.10.2 AI Chatbot Support

The AI assistant gives instant, conversational answers to your questions. If AI is temporarily unavailable, it falls back to built-in FAQ answers, so help is always available.

5.10.3 Live Chat Support

Switch to Live chat to message the farm team directly for personalised help with orders, pricing, or delivery when the assistant cannot fully resolve your question.

6. Admin / Staff Manual Section

This section guides farm staff on using the admin console to manage the business. Access to each area depends on the staff member's role (admin, manager, sales, inventory, or delivery).

6.1 Admin Login

Staff sign in through the separate Admin login page using their staff credentials. Only users with a staff role can open the console; customers are redirected to the shop.

Figure 5: The staff / admin console login.

6.2 Dashboard Overview

The dashboard summarises recent activity — orders, revenue, and items that need attention such as pending approvals and payments.

6.3 Managing Customers (Approvals)

Under Customers, staff review new business registrations and **approve**, **reject**, or **suspend** accounts. Only approved businesses can see pricing and place orders.

6.4 Managing Products & Pricing

Staff can add and edit products, set each grade's details, and manage the bulk pricing tiers that determine per-tray prices at different quantities.

6.5 Managing Inventory

The Inventory page shows trays on hand, reserved, and available per grade, highlights low-stock items, and records stock movements (for example, new production added).

6.6 Managing Orders

Orders can be viewed as a board and moved through their stages (Confirm, Pack, Out for delivery / Ready for pickup, Delivered). Opening an order shows its items, customer, delivery details, and payment status.

6.7 Verifying Payments

Under Payments, staff review uploaded bank-transfer slips and mark them verified or rejected. Cash-on-delivery orders are settled on delivery.

6.8 Managing Delivery Zones

Staff configure delivery zones, their fees, and blackout dates on which delivery is not available, which controls the dates customers can choose at checkout.

6.9 Reports & AI Insights

The Reports page shows revenue, orders, trays sold, revenue by grade, and payment-method split for a chosen period. The **AI Insights** panel turns these figures into a short, plain-English summary with recommended actions. Only aggregated totals are analysed — no customer data leaves the server — and a rule-based summary is shown if AI is unavailable.

6.10 Live Chat Management

Staff open and reply to customer live-chat conversations and close them once the issue is resolved.

6.11 Staff & Role Management / Settings

Administrators and managers can invite staff and assign roles that control which console areas each person can use, and update business settings such as contact and bank details.

7. Security and Best Practices

- Use a strong, unique password and change it periodically.
- Keep your login credentials confidential and never share verification codes.
- Always log out on shared devices.
- Staff should only be given the role their duties require.

8. Error Handling / Troubleshooting

Issue	Possible reason	Solution
OTP code not received	Email delay or wrong email address	Check the spam folder and re-enter the correct email address.
Cannot see prices or place an order	Business account not yet approved	Wait for admin approval; you will be able to order once approved.
No delivery date available	Past the 6 PM cut-off, or a blackout/non-delivery day	Choose the next available delivery day, or select pickup.
Payment still shows unpaid	Slip not uploaded or not yet verified	Upload the bank slip; staff will verify it shortly.
Cannot open the admin console	Account is not a staff role	Use a staff account, or contact an administrator for access.
Page shows old or wrong data	Temporary loading issue	Refresh the page and check your internet connection.

9. Frequently Asked Questions

1. How do I start ordering?

Register a business account, verify your email with the 6-digit code, and wait for admin approval. Once approved you can see prices and order.

2. Why can't I see prices?

Wholesale prices appear only after your business account is approved by the farm team.

3. What is the minimum order?

The minimum order is 5 trays; each tray holds 30 eggs.

4. How do I pay?

Pay by bank transfer (upload your slip in the app for verification) or by cash on delivery.

5. When can my order be delivered?

Deliveries run on Mon/Wed/Fri/Sat. Order before 6:00 PM the day before your chosen delivery day, or pick up from the farm for free.

6. Who can access the admin console?

Only staff accounts with a valid role (admin, manager, sales, inventory, or delivery).

10. Contact Support

- **Project team:** _____ (name / email)

11. Conclusion

This user manual explains the main functions of the CoopCart platform for both wholesale customers and farm staff. By following the instructions provided, customers can register, browse graded eggs, place and track orders, and pay conveniently, while staff can manage customers, products, inventory, orders, payments, and reports — helping Abeyrathna Farms run its wholesale business efficiently.
